

✘ SC-10 are high quality square type Horn Speakers providing performance even in the harshest environments. Straight and ultra-high power horns give a highly articulate sound performance in high noise areas or at large gatherings of people. All models include a line transformer for 100V constant voltage operation. A tap switch is available at the back of the speaker to change the impedance for different power applications. The bracket is “U” shaped and makes easy the mounting on any support for multi-directional coverages. Made of ABS resin, the devices are IP66 and can be used any places indoor or outdoor.

MODEL	SC-10AH
Type	Reflex – Square
Rated Input Power	10W
Transformer Tap	1, 3, 5, 10W
Input Impedance (100V)	1k, 2k, 3.3k, 10kΩ
Preset Impedance (100V)	1kΩ
Input Impedance (70/25V)	63, 130 Ω (25V only) 0.5, 1k, 1.7k, 2.9kΩ
Preset Impedance (70/25V)	500 Ω
Frequency Response	500 Hz ~ 6 kHz
SPL (1W/1m)	103 dB
Coverage (at 1kHz, H x V)	60° x 60°
Material	ABS
Protection Rate	IP66
Bracket	“U” shaped
Pantone	Ivory 1205C

Weight	1.37 kg
